#### What is PQRS?

The Physician Quality Reporting System (PQRS) was developed by CMS in 2007 as a voluntary reporting program that provides a financial incentive to physicians and other eligible professionals who report data on quality measures for covered services furnished to Medicare beneficiaries.

## What is PQRIwizard<sup>SM</sup>?

The **PQRI**wizard is a fast, convenient, and cost-effective online tool to help collect and report quality measure data for the Centers for Medicare & Medicaid Services (CMS) PQRS incentive payment program. Similar to online tax preparation software, the **PQRI**wizard helps guide you through a few easy steps to help rapidly collect, validate, report, and submit the results to CMS for payment. The **PQRI**wizard is powered by the CECity Registry®, a CMS qualified registry for PQRS reporting.

#### What is the Financial Incentive?

Eligible providers who participate in PQRS 2011 can receive an incentive payment of 1% of their total allowed charges for Physician Fee Schedule (PFS) covered services.\*

### Why Use PQRIwizard?

- ★ Automatic Data Validation
- ★ Minimize Data Entry Time
- ★ Eliminate Claims and Coding
- ★ Report PQRS Data Prospectively or Retrospectively

The **PQRI***wizard* features 25 quality measures in the areas of hematology, oncology and general medicine, including ASH's four hematology measures on myelodysplastic syndrome, acute leukemias, multiple myeloma, and chronic lymphocytic leukemia.

To report on any of these Individual Measures, you simply select three measures and report on 80% of your Medicare Part B Fee-For-Service (FFS) patients that apply to the measures you selected. You can enter the data into our system by completing the online questionnaire OR upload the data from your existing electronic medical record system into **PQRI**wizard using an .XLS, .XLSX or .CSV file.

**PQRI***wizard* has a built-in Progress Monitor that checks for missing data to validate your report. The Progress

Monitor tracks your data to provide you with continuous feedback regarding valid patients. The system even calculates your measures and provides a printable report of your measure results in real-time.

#### **How Do I Participate?**

Use the **PQRIwizard** to submit your PQRS data! All you need to do is register, select your measures and then just answer a few questions per patient, or upload your data file! **PQRIwizard** takes the guessing out of PQRS participation—just follow the simple steps and let the wizard do the rest!

\*Note: Submission of data to CMS is not a guarantee of payment by CMS.

† A 2011 PQRS report cannot have a zero percent performance value for any one measure.
