

ASH MINORITY RECRUITMENT INITIATIVE

New Research Opportunities for Pre- and Post-Doctoral Fellows!

Minority Hematology Graduate Award (MHGA)

offers PhD students exposure to hematology by providing support to conduct hematology-related research.

Award benefits include:

- \$80,000 to support two years of research
- The opportunity to present research findings at the ASH annual meeting, the world's premier hematology event
- Complimentary ASH membership, including subscriptions to *Blood* and *The Hematologist*

Minority Hematology Fellow Award (MHFA)

encourages junior researchers in hematology to pursue careers in academic hematology. The award is designed for MD/DO, PhD, and MD/DO-PhD post-doctoral fellows.

Award benefits include:

- \$100,000 to support two to three years of research
- The opportunity to present research findings at the ASH annual meeting, the world's premier hematology event
- Complimentary ASH membership, including subscriptions to *Blood* and *The Hematologist*

The American Society of Hematology (ASH) introduced the ASH Minority Recruitment Initiative to increase the participation of underrepresented minorities in hematology-related fields. Award programs are available to support underrepresented minorities throughout their medical education and careers.

**Apply by
January!**

ASH MINORITY RECRUITMENT INITIATIVE

Longitudinal Pathway

The ASH Minority Recruitment Initiative was created by the American Society of Hematology (ASH) to increase the participation of underrepresented minorities training in hematology-related fields and increase the number of minority hematologists with academic and research appointments. The initiative includes an unbroken longitudinal pathway of programs to support the careers of future hematologists.

Minority Graduate Student Abstract Achievement Award (MGSAAA) is designed to attract and/or retain PhD students to the field of hematology through the ASH annual meeting, where students will hear the latest advances in hematology-related research and interact with ASH leadership, senior researchers, minority physicians, scientists, and students.

Minority Hematology Graduate Award (MHGA) offers PhD students exposure to hematology by providing support over a two-year period to conduct hematology-related research.

Minority Medical Student Award Program (MMSAP) provides medical students with an opportunity to conduct a research project under the supervision of an ASH member, receive guidance from a career-development mentor, gain valuable knowledge of hematology, and ultimately, advance their careers.

Minority Resident Hematology Award Program (MRHAP) provides support for resident physicians in an internal medicine, pathology, or pediatric residency program to conduct hematology-focused research. Under the guidance of a career-development mentor, trainees will gain valuable knowledge of hematology and resources to help advance their careers.

Minority Hematology Fellow Award (MHFA) encourages junior researchers in hematology to pursue careers in academic hematology. The award is available to MD/DO, PhD, and MD/DO-PhD post-doctoral fellows.

ASH-Harold Amos Medical Faculty Development Program (ASH-AMFDP) seeks to increase the number of underrepresented minority scholars in the field of hematology with academic and research appointments with four years of postdoctoral research support and other benefits.

The ASH Minority Recruitment Initiative is part of the American Society of Hematology, the world's largest professional society serving both clinicians and scientists around the world who are working to conquer blood diseases.
