Scholarship FAQ

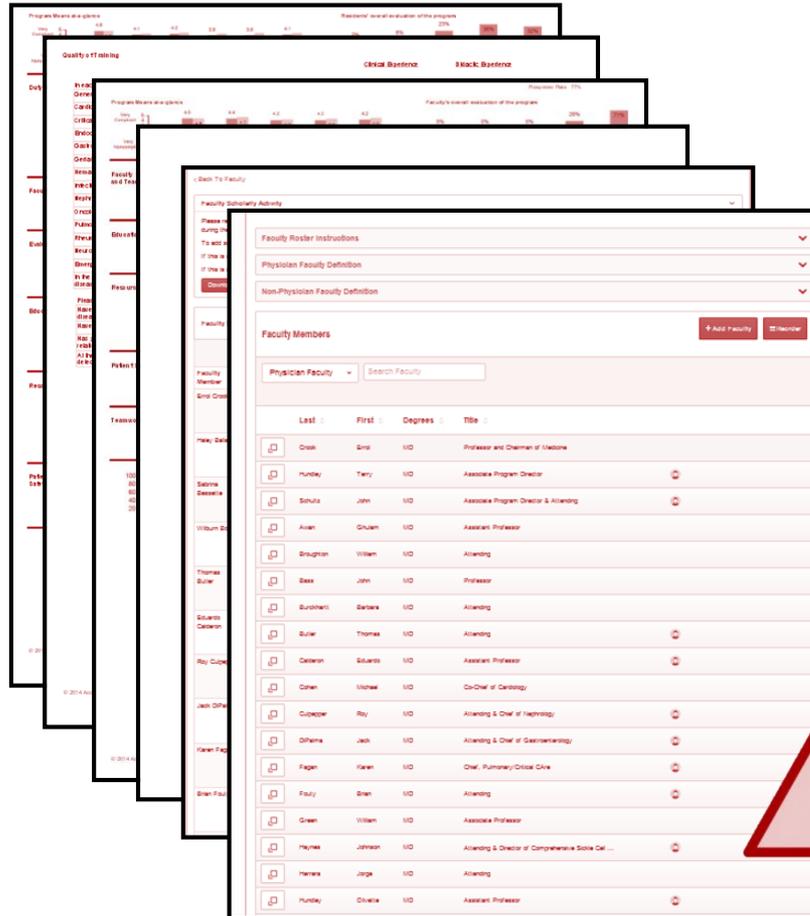

Milestones 2.0

How does RC review established programs?

NAS – ~~Next~~ NOW or NEW Accreditation System

RC reviews every established program **annually** using data

NAS Process: Continuous Accreditation

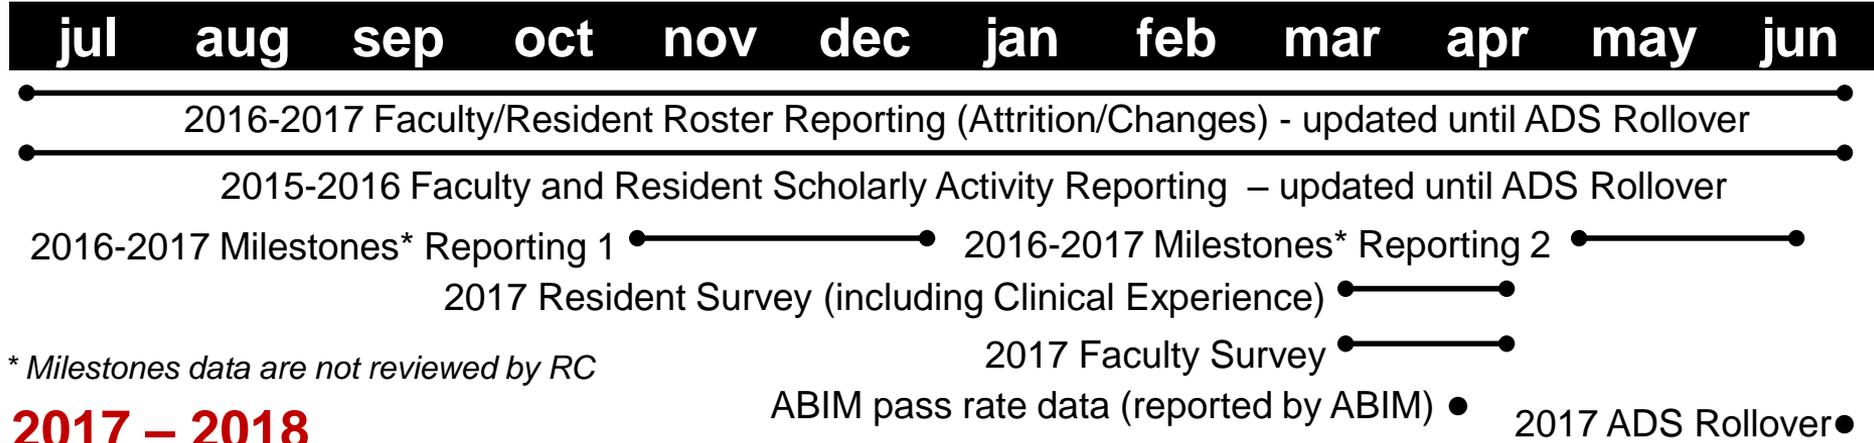

Data Elements (Indicators)

- Fellow Survey
- Clinical Experience
- ABIM Pass Rate
- Faculty Survey
- Scholarly Activity
- Attrition/Changes/Ratio
- Omission of Data

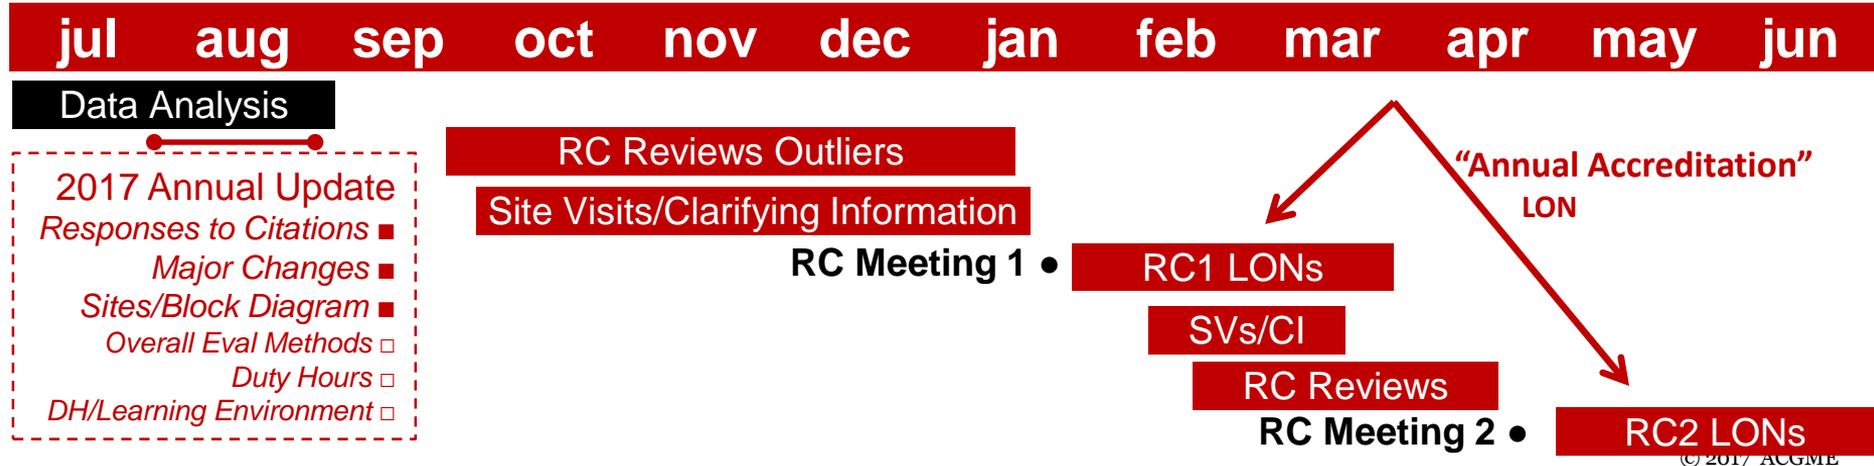

NAS Process: Continuous Accreditation

2016 – 2017

2017 – 2018

What's an "outlier?"

1. Programs with Citations

- *Is the program addressing the citations?*
- *Are there positive outcomes?*
- *Is there enough information?*

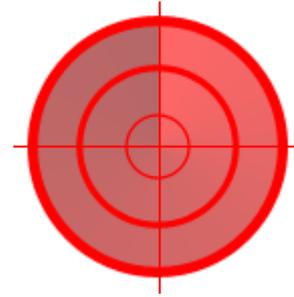

2. Programs flagged on NAS data elements

- *Are there multiple elements flagged?*
- *Which elements were flagged?*
- *Are there trends?*
- *Is there enough information?*

If there is not enough information...request clarifying information or a site visit.

Use “Major Changes and Other Updates” in ADS

- Be proactive
- Provide context
- Describe outcomes

Major Changes and Other Updates

Major changes to the training program since the last academic year, including changes in leadership. This may also include improvements and/or innovations implemented to address potential issues identified during the annual program review.

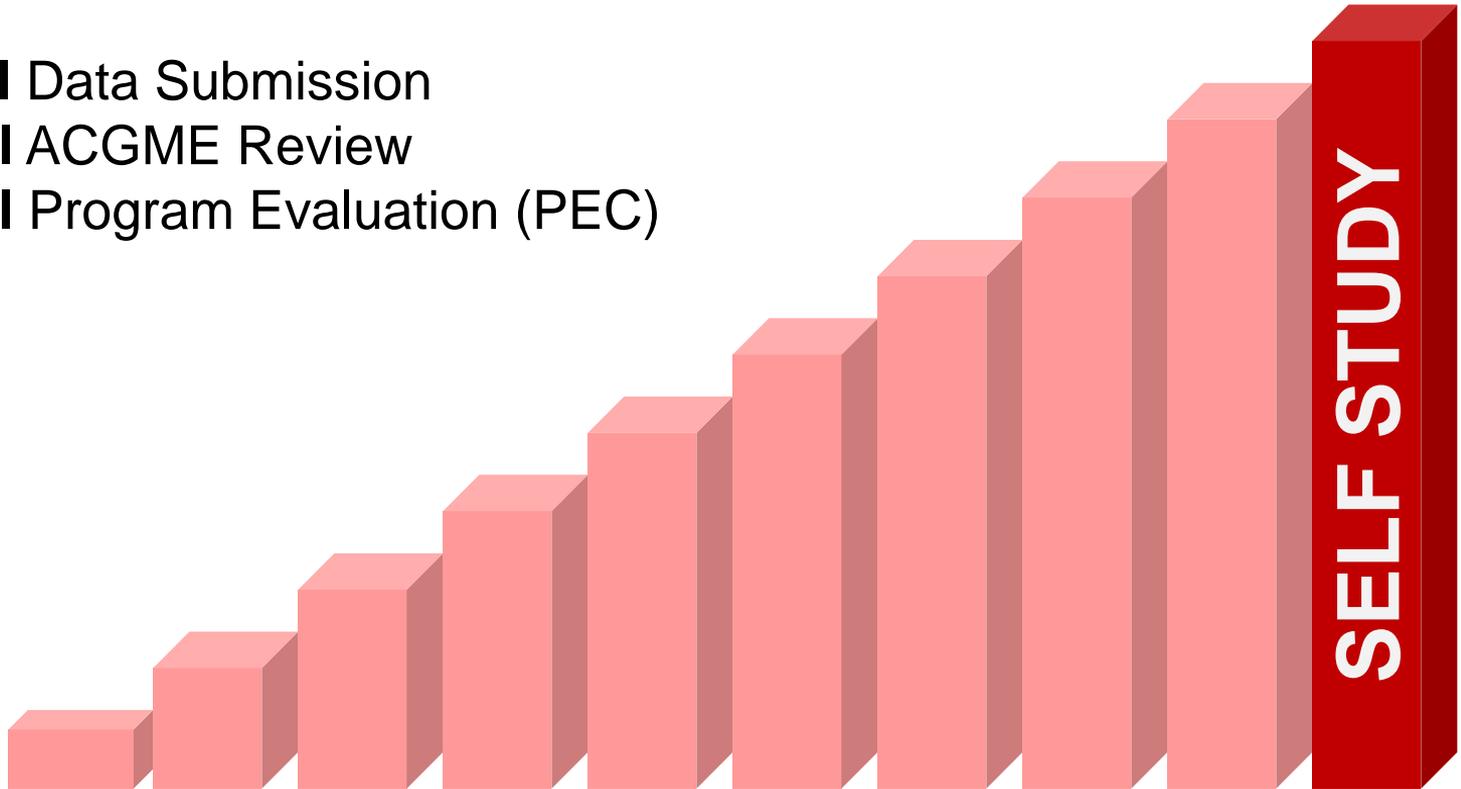

[Enter text here] |

Compare + Contrast: Citations + AFIs

Citations	Areas for Improvement/Concerning Trends
<p>A citation identifies an area of noncompliance and refers to a specific program requirement</p>	<p>An AFI can identify an area of noncompliance, but also may be a warning that compliance is borderline or that trends indicate noncompliance is likely imminent.</p>
<p>A citation is added to the program's history and requires a response in ADS during the program's Annual Update.</p>	<p>An AFI is added to the program's history, but does not require a response in ADS, though identifying corrective actions in the "Major Changes" field during the Annual Update is a good practice.</p>
<p>A citation is reviewed annually until the RC is satisfied that the area of noncompliance has been adequately addressed and the citation is "resolved." If the RC is not satisfied by the program's response, it will be "extended."</p>	<p>An AFI is not reviewed unless the program is re-identified as an outlier. If the AFI is still a concern during a subsequent review, it will likely escalate to a citation. The RC expects that the concern will be addressed, corrected, and monitored for continued compliance locally.</p>

NAS Process: Continuous Improvement

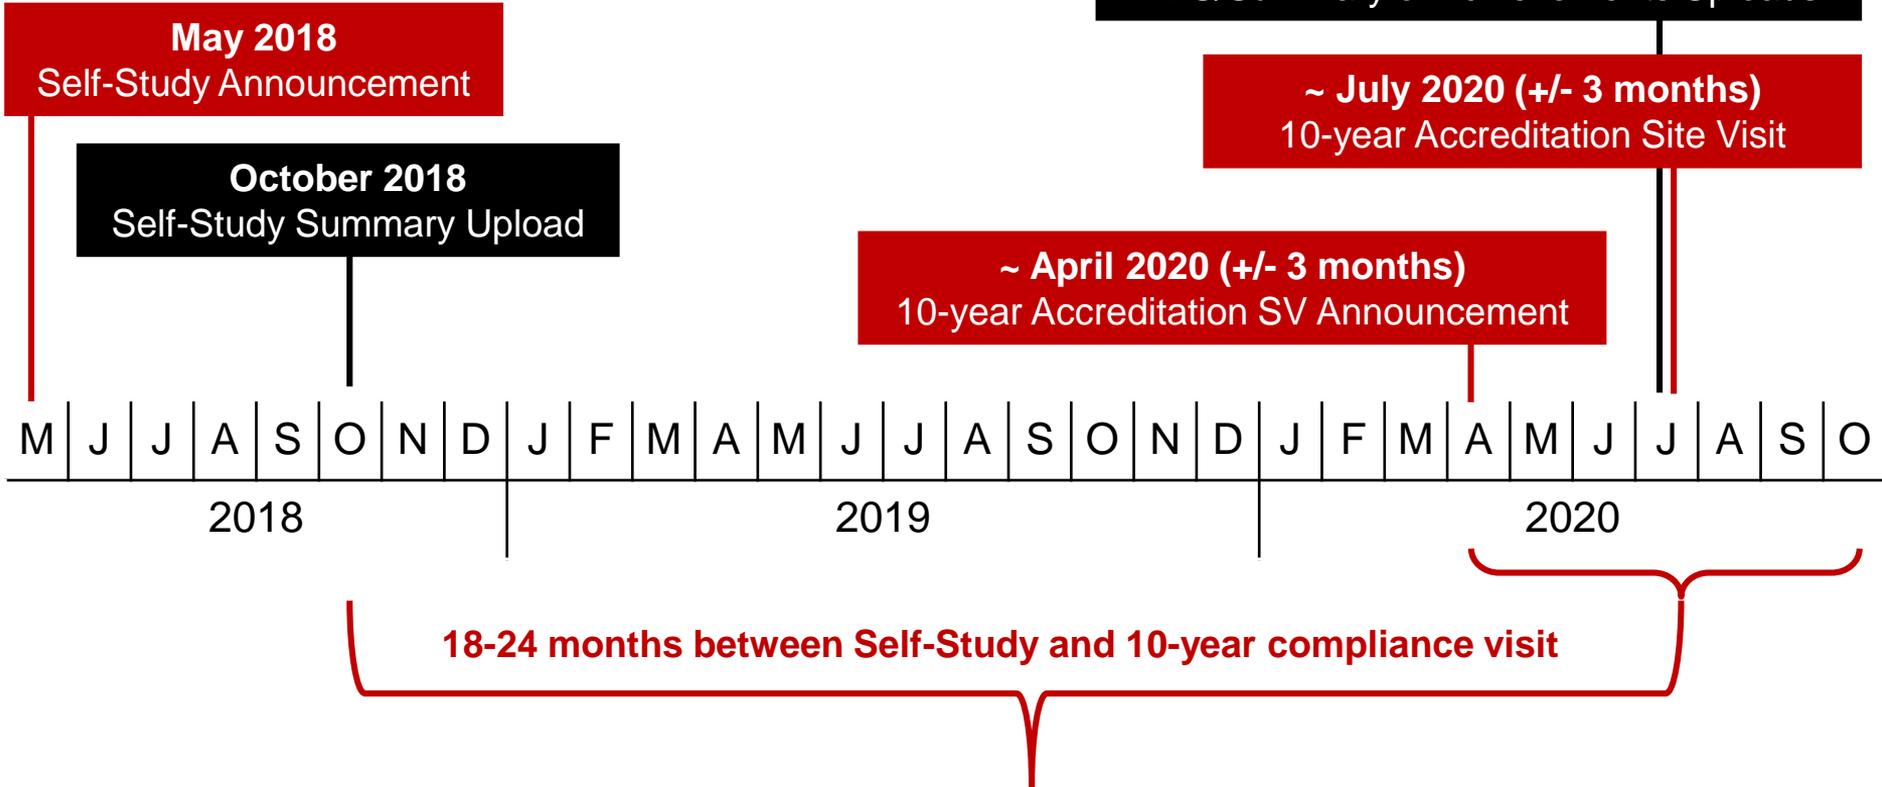

- **Annual** Data Submission
- **Annual** ACGME Review
- **Annual** Program Evaluation (PEC)

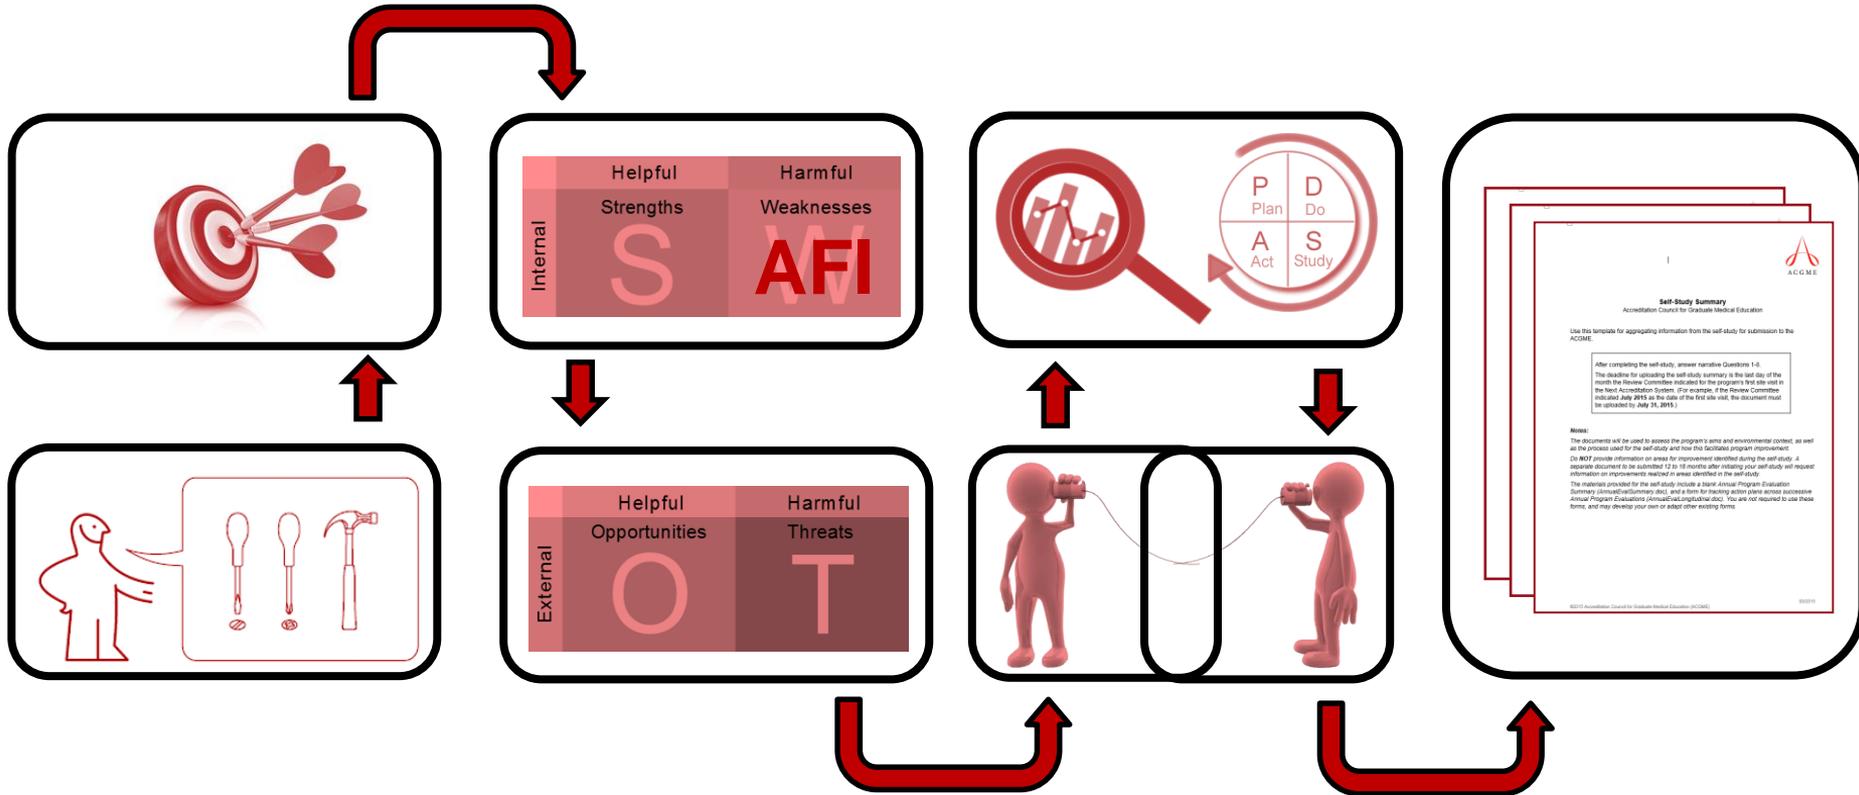

Self-Study/10-year Timeline

Self-Study

Eight Steps for Conducting The ACGME Program Self-Study

The suggested eight-step sequence described here is intended to offer guidance to programs conducting their first self-study.

The self-study is an objective, comprehensive evaluation of the residency or fellowship program, with the aim of improving it. Underlying the self-study is a longitudinal evaluation of the program and its learning environment, facilitated through sequential annual program evaluations that focus on the required components, with an emphasis on program strengths and "self-identified" areas for improvement ("self-identified" is used to distinguish this dimension of the self-study from areas for improvement the Review Committee identifies during accreditation reviews).

To offer context for the self-study, there are two main components: 1) an exploration of program aims; and 2) an assessment of the program's institutional environment. Both are discussed in detail below. The focus on aims and the program's environment is to provide context for the self-study, to ensure the focus on the program's environment is not an end in itself, but a means to the end of the program evaluation, and support improvement that goes beyond the self-study.

Additional Notes

Conducting the self-study for a dependent subspecialty program

The ACGME has placed added responsibility for oversight of subspecialty programs on the core program and sponsoring institution. The self-study group for the core program and sponsoring institution should coordinate activities with the self-study groups for any dependent subspecialty programs, to explore potential synergies, and reduce the burden that may be associated with conducting a self-study.

The 10-year site visits for subspecialty programs will be coordinated with the visit of their respective core program.

1. Assemble the self-study group
2. Engage program leadership and stakeholders in a discussion of program aims
3. Examine opportunities for synergies
4. Aggregate and analyze data to generate a longitudinal assessment of the program's improvement

Coordinators/Overseers should coordinate with the core program to improve your experience.

“Additional Notes”

Conducting the self-study for a dependent subspecialty program

- The ACGME has placed added responsibility for oversight of subspecialty programs on the core program and sponsoring institution.
- The self-study group for the core program should try to coordinate activities with the self-study groups for any dependent subspecialty programs, to take advantage of common dimensions, explore potential synergies, and reduce the burden that may be associated with conducting an independent self-assessment.
- The 10-year site visits for subspecialty programs will be coordinated with the visit of their respective core program.

We're from
the ACGME,
and we're
here to help!

...Two Site Visits in One

Self-Study Review

Self-Study Report

- Verifies that the self-study document offers an objective, factual description of the learning and working environment
- Verifies educational outcomes and their measurements and how processes and the learning environment contribute to these outcomes

Compliance Review

Compliance Report

- Assessment of Compliance with Program Requirements
- For programs on Continued Accreditation, focus is on “Core” and “Outcome” Requirements

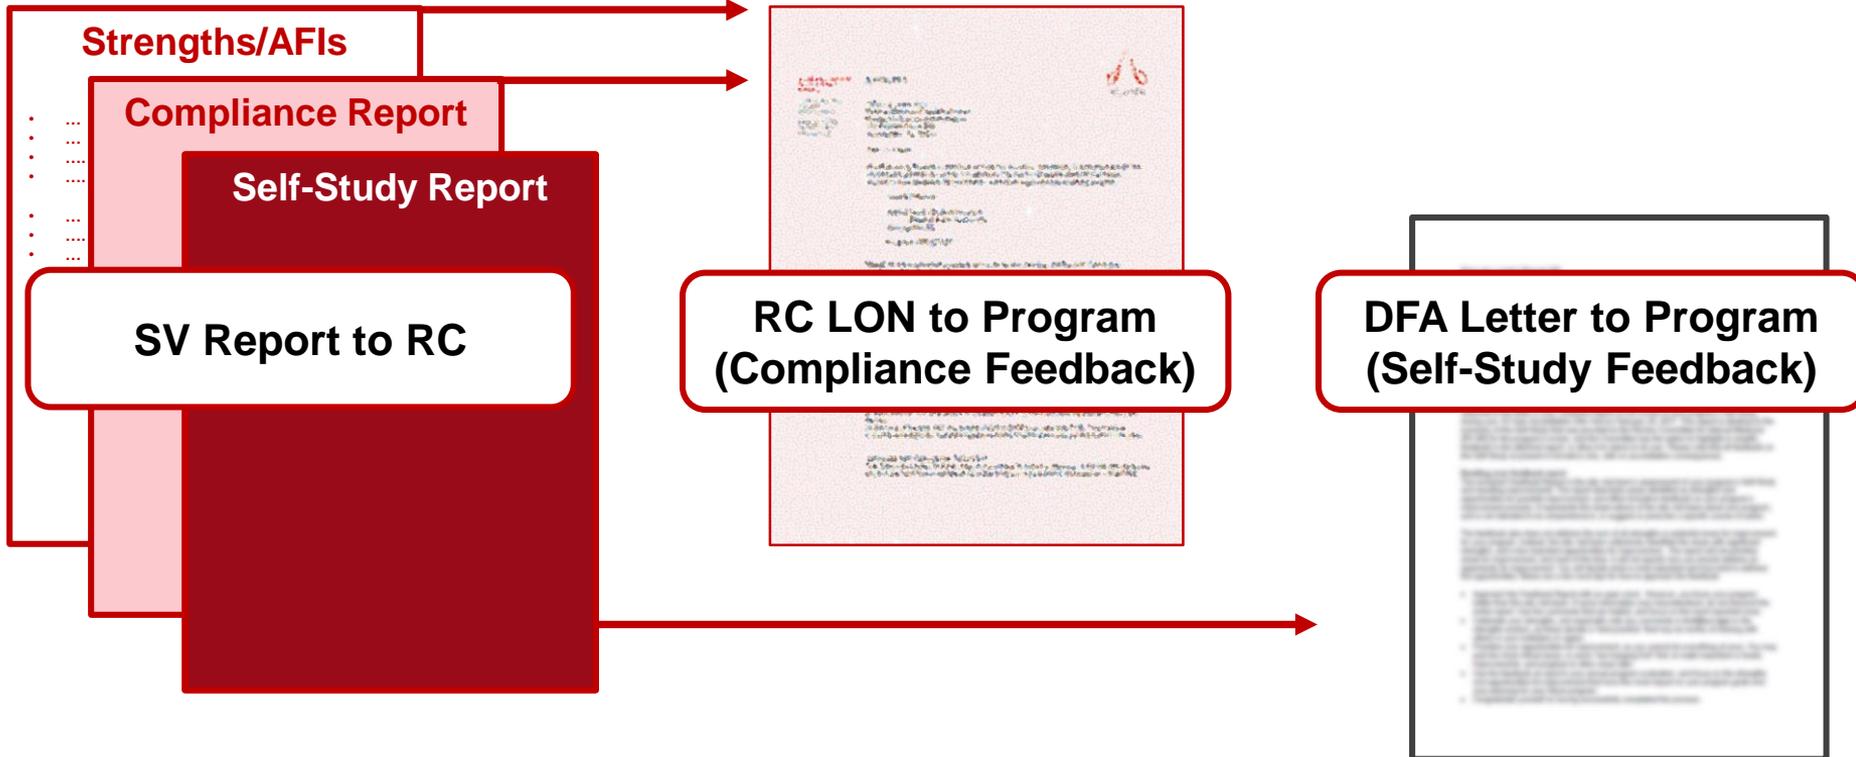

Strengths/AFIs

- Assessment of program strengths and areas for improvement
- Note: This is the field staff’s assessment, not the strengths/AFIs identified by the program in the self-study (though there may be overlap).

Scholarship FAQ

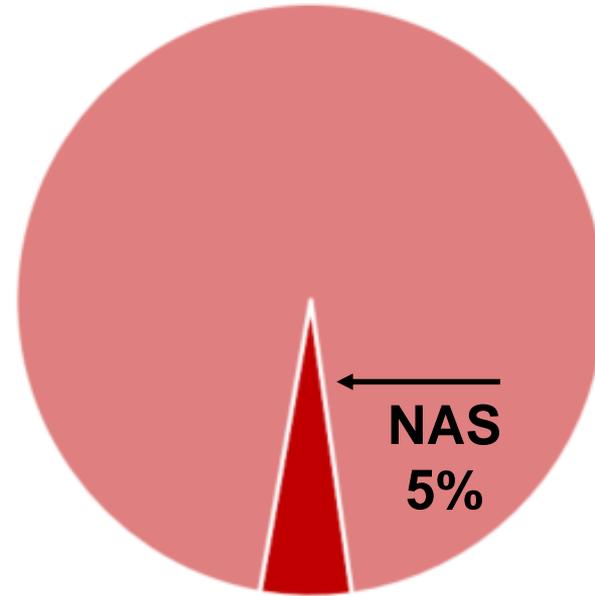

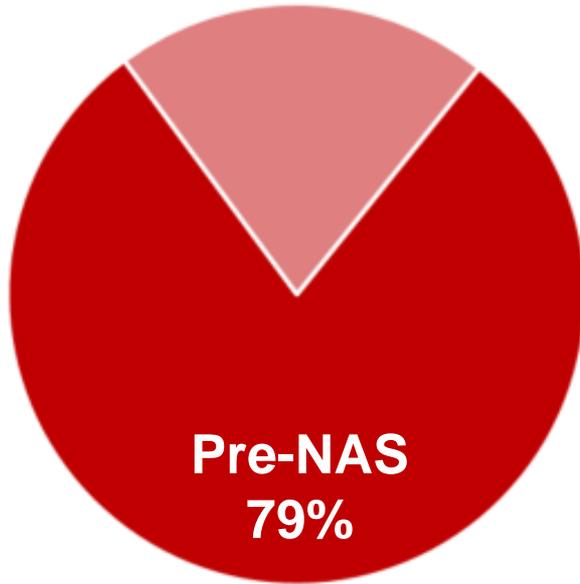

Milestones 2.0

NAS Goal: Reduce Burden

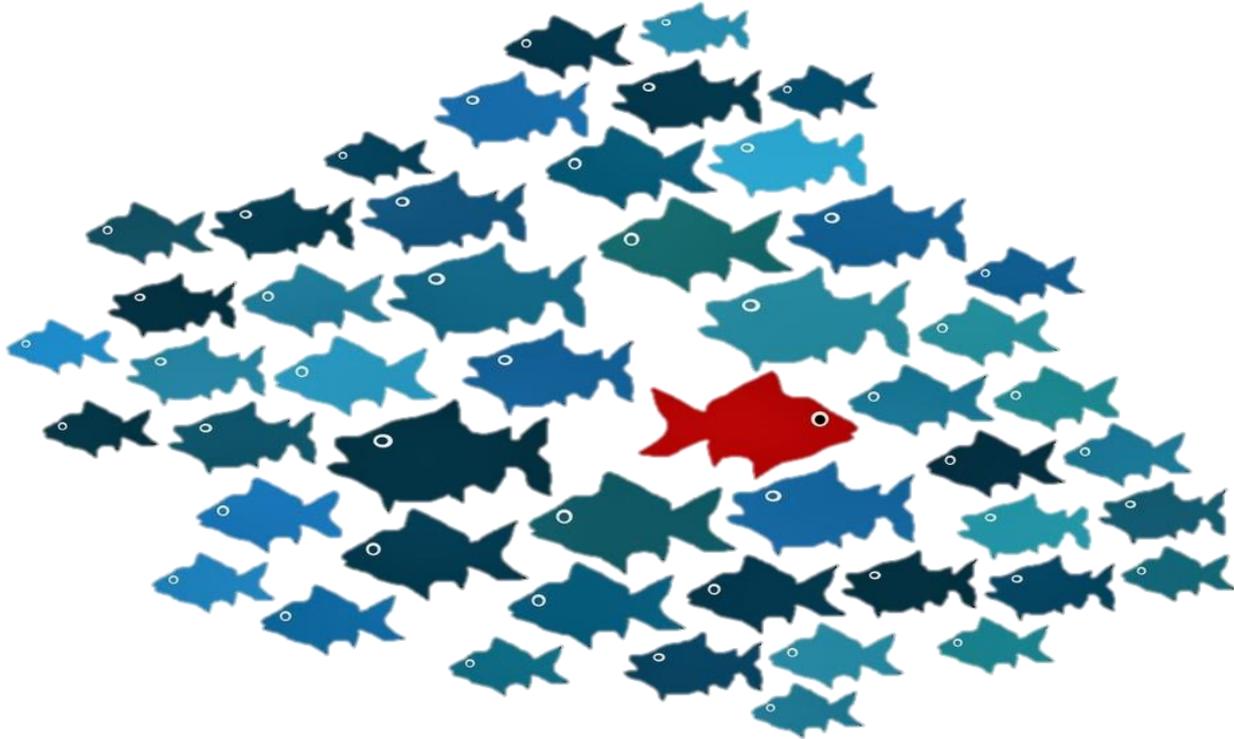

% of IM programs (core and sub) with **site visits per year**

NAS Goal: Reduce Burden

% of IM programs (core and sub) with **citations**

Another NAS Goal: Innovation

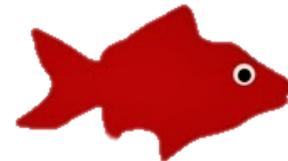

How does NAS promote innovation?

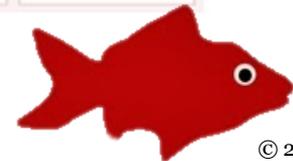

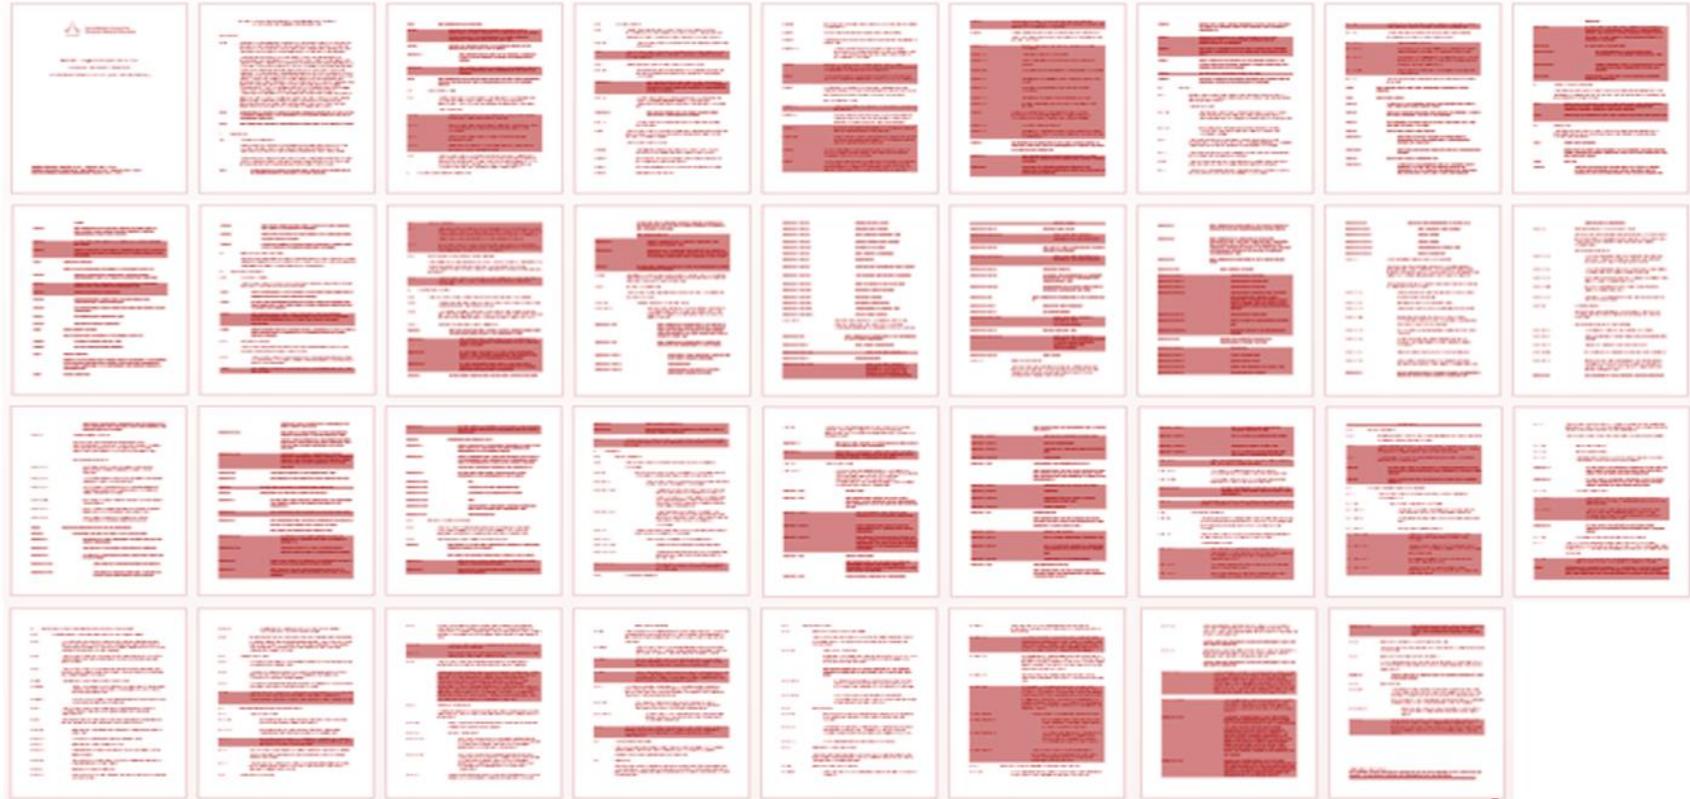

In NAS PRs are categorized as *Outcome*, *Core* and *Detail*

- *Outcome* - *Statements that specify expected measurable or observable attributes (knowledge, abilities, skills, or attitudes) of residents at key stages of their GME*
- *Core* - *Statements that define structure, resource, or process elements essential to every graduate medical educational program.*
- *Detail* - *Statements that describe a specific structure, resource, or process, for achieving compliance with a Core PR. Programs and sponsoring institutions in substantial compliance with the Outcome PRs may use alternative or innovative approaches to meet Core PRs.*

Programs in substantial compliance with *Outcome* and *Core* and PRs can innovate with *Detail* PRs.

Scholarship FAQ

Milestones 2.0

“Task Force I” Revised Section VI of the CPRs

The screenshot shows the ACGME website page for 'Common Program Requirements: The Learning and Working Environment (Duty Hours)'. The page is divided into sections: 'Clinically-Driven Standards', 'Quick Links', and 'Learn more about the ACGME Common Program Requirements at ACGME.org'. The 'Quick Links' section includes links for 'Common Program Requirements Section VI with Background and Intent', 'Common Program Requirements Section VI with Revised Changes', and 'Section VI QIA'. The 'Learn more about the ACGME Common Program Requirements at ACGME.org' section includes a link to 'E-mail questions about the revised requirements to SectionVI@acgme.org'.

Standardized 24-hour maximum shift
16-hour rule for interns was removed

New sections for patient safety, QI, well-being

- *Effective date of implementation July 1, 2017*
- *Assessment of new sections will not be cited until 2019*

Increased flexibility

No longer need to document when shift exceeds 24 hours

Potential for burden?

- *Resources for patient safety, QI, well-being*
- *Counting work at home as clinical and educational work hours*

https://acgmecommon.org/2017_requirements

“Task Force II” Will Revise the rest of the CPRs

RC-IM Chair Christian Cable is on Task Force II.

Scholarship for Subspecialty Faculty

In the past, the RC-IM has had a very high bar for scholarship from fellowship faculty—X publications from Y faculty (varies by complement).

Not meeting that minimum number of required publications led to citations for existing programs, and accreditation was withheld from new applications.

That was the past...

NEW Scholarship FAQ for subs

The Review Committee requires that fellowship education occur in an environment of inquiry, scholarship, and research productivity in order to promote and inspire a professional commitment to lifelong learning. It concluded that current PRs II.B.7.e.(1-2) too narrowly defined scholarship. As such, **the Committee has broadened its interpretation of scholarship and now considers the scholarship of not only discovery, but also application, integration and teaching, as long as the scholarly products are characterized by clear goals, adequate preparation, appropriate methods, significant results, effective presentation, and reflective critique.** ^{1,2,3,4}

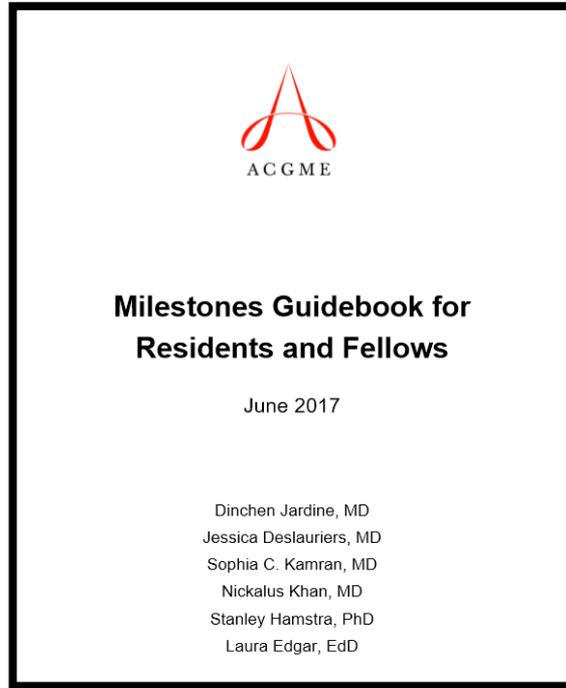

The Review Committee expects programs to document annually that 50% of the key clinical faculty (KCF) engage in a *variety* of scholarly activities, as listed in section II.B.5.a & b (1-4). If 50% of the KCF give grand rounds presentations exclusively, the program will not have demonstrated compliance with the expectation because the program has not provided evidence of a variety of scholarly activity. The Review Committee considers the fellows' scholarly output as well as their perceptions of whether the program has created a scholarly environment when determining whether the program has adequately established and maintained an environment of inquiry and scholarship.

Preliminary conversations...

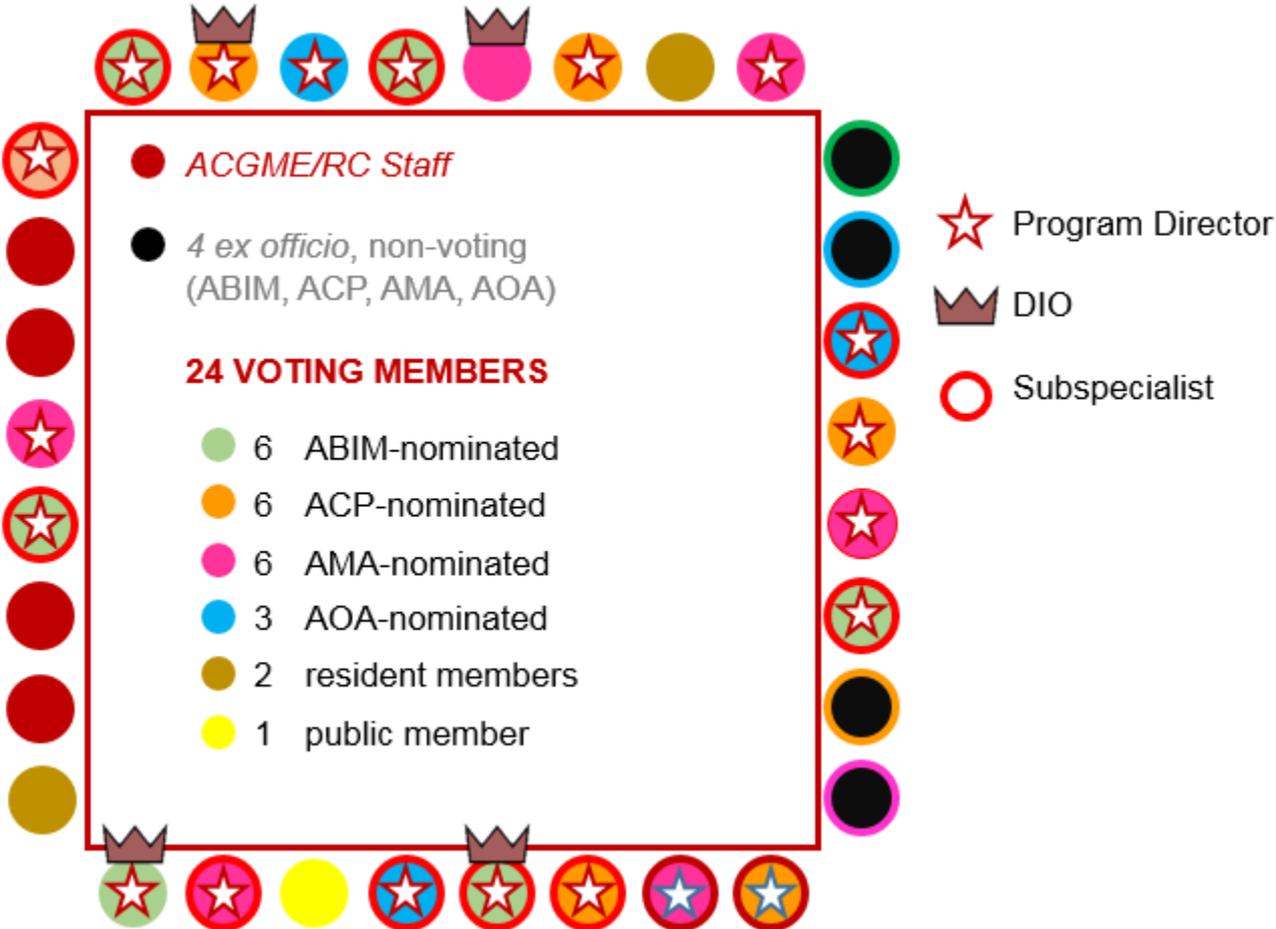

- In February, Milestones Dept announced it would try to *harmonize* the four common milestones – PROF, ICS, PBLI and SBP.
 - That is, have these common milestones be the same across all specialties/subspecialties.
- In December, there will be a summit with members of the IM core and subspecialty community to determine whether there is interest in making changes to the PC and MK milestones.
