

**2025 Scientific Workshop on Germline Predisposition to Hematopoietic Malignancies
and Bone Marrow Failure**

Friday, December 5, 2025, 3:00pm – 6:00pm, Orlando, FL

Please complete the form below and submit it by **Monday, Aug 11th** to the workshop Co-organizers:

Lucy A. Godley, MD, PhD: lucy.godley@northwestern.edu

Marcin Wlodarski, MD, PhD: marcin.wlodarski@stjude.org

Mark the session title in which you would like to present:

SESSION 1: DISEASE MODELS AND MECHANISMS: BRIDGING THE GAP

This overarching session will explore how model organisms and innovative experimental approaches are illuminating the pathophysiology of HMs and BMF disorders across multiple genetic backgrounds.

SESSION 2: DNA REPAIR DEFECTS AND GERMLINE PREDISPOSITION

This focused session will examine how deleterious germline variants in genes encoding components of DNA repair pathways lead to BMF/HMs and potential therapeutic approaches.

SESSION 3: RIBOSOMOPATHIES: FROM DBA TO SDS AND BEYOND

This focused session will address advances in understanding the molecular mechanisms underlying ribosomopathies and their progression to malignancy.

SESSION 4: EMERGING DISCOVERIES IN GERMLINE PREDISPOSITION

This overarching session will highlight new scientific discoveries that reveal mechanistic insights into disease pathogenesis and adaptation of gene therapy approaches to cure these conditions.
